About Us

The Company was founded in 1976 in Crotona, in Italy, a city overlooking the Ionian Sea, where there are some offshore plants for the production of natural gas.

The local presence of the platform field has allowed the specialization and expansion of the Company that has set itself the goal of collaborating with the main international Companies operating in the Oil-Industry, through the provision of its services in the maritime sector.

Over the years, the various collaborations, in particular with the multinational ENI, have led the Company to increase its services to support the activities in offshore extraction sites adopting a new policy aimed at improving the quality and safety of operations, thus guaranteeing reliability, rapidity and great skills in problem solving.

VREMAR constantly sets new goals and ambitions that operate in compliance with the **International Standards ISO-9001, ISO-14001, OHSAS-18001**, obtaining the certification of its management systems, adopting procedures and equipment to ensure the safety of workers, environment protection and respect for human rights.

The Company is constantly improving and keeps the pace in the market competition in an organized way.

The main objective of VREMAR is to guarantee professionalism and competence in the provision of its services, providing maximum availability and attention to its Customers's needs.

Services

Sea services in both national and international water.

- Support for bathymetric and seismic surveys;

Mission

Vremar is daily dedicated to disseminating, at each hierarchical level, a corporate culture aimed at reaching the set targets, through the respect of professional ethics, and above all environment.

The main aims, derived from the guide lines of the "company policy" are:

- Attention to the appropriateness of the strategies adopted;
- Control of all standards closely connected with quality and environment and their application in both ethical and social fields, in line with the company's strategies;
- Customer satisfaction, through the continuous improvement, in terms of technical knowledge, application of the internal Audit process and availability of innovative services, in full compliance with the laws and the application processes at a national and international level.
- Guarantee always and in every situation the collaboration between Vremar and the Client, by acting as courteous and helpful counterpart for the achievement of the common targets;
- Guarantee the continuous training and professional development to Company staff of every level and category;
- Implement new activities and services ensuring to look for innovative processes shareable with Clients;
- Prioritize the achievement of the client's targets, in order to improve its competitiveness and performance and satisfy its demands and requirements, as a fundamental requirement also in achieving the Company's targets and giving rise, inter alia, to opportunities for involvement and motivation.

Our commitment, our availability and the dedication given to our work, fill us with pride and inspire us to set continuously new ambitious targets.

Health, Safety, Environment and Quality

Vremar Srl, defines and approves the "Company Policy" and the guidelines for the Quality, Environment and Safety Management System (hereinafter referred to as SGI) that documents the targets and commitments undertaken, according to the Company strategies towards the Customers, the Market and the Environment.

The SGI allows the implementation of the guidelines making them shared within the Company by all the staff, with the primary target of Customer satisfaction and the dissemination of its image on the market.

The Company operates with efficient and transparent methods and systems that guarantee the implementation of all internal and external processes, taking care to respect the ethical rules, regulations, national and international standards.

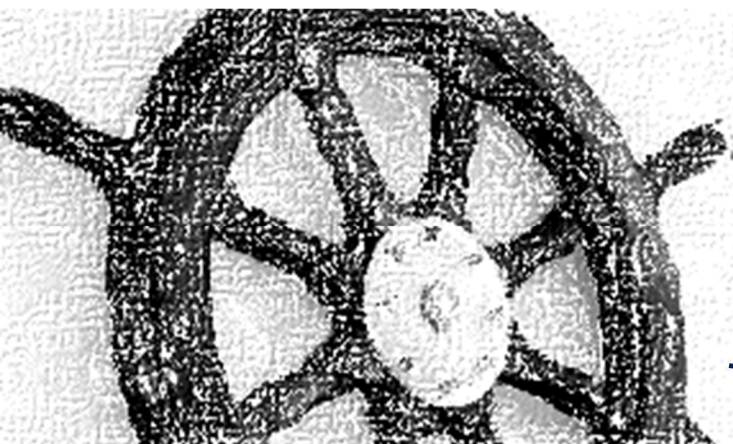

In 2002 VREMAR SRL obtained the **ISO 9001** certification and the Quality Management System was adopted to meet the requirements specified in the UNI EN ISO 9001 standard.

In 2014 the Company obtained certification of compliance with international standards **ISO-14001** and **OHSAS18001**.

The Certification has allowed the Company to constantly expand and improve in terms of effectiveness and timeliness in interventions through a security policy to defense the safety of life, the protection and respect for the environment.
